Heidi Pridemore, Fabric and pattern designer, teacher, author

Heidi was born and raised in Rochester, NY, where she received a bachelor's degree in Industrial Design from Rochester Institute of Technology. In 2000, Heidi began offering her services as a product designer to a number of fabric companies. She created her own line of quilt patterns in 2002 and in 2004 Heidi started designing fabric in her own bright and whimsical style. By 2005 the work load warranted expanding to a partnership and The Whimsical Workshop LLC began with Heidi as the main designer. Heidi is known for her fun and whimsical quilts which she often makes in dramatic, bright colors. She also has an excellent reputation for writing clear and easy to follow instructions. Heidi designs a large number of project sheets featuring fabric lines from national companies such as Blank Quilting, Clothworks, Avlyn, Kings Road and Robert Kaufman. She also designs quilt patterns for a variety of popular quilting magazines such as Quiltmaker, McCall's Quick Quilts, The Quilter and Quilter's World. In addition she has completed four books; Quilted Whimsy, Bold Batiks and Dazzling Designs for Leisure Arts. For C&T Publishing she has written "Pop Up Paper Structures" due to be released July 2007. Heidi spends most of her time designing and traveling to trade show, giving lectures and running workshops. When not traveling she enjoys staying at home in Arizona with her husband Matthew and their Great Pyrenees dog Cleo.

Fish Wall Hanging

36" square. Includes full-size reversed templates and placement drawings.

OR

20" x 26". This pattern comes with full-size reversed templates and a full size placement drawing.

Class including kit and pattern \$ TBD

Fishy Beach Bag

Come build the perfect bag to hold all of your beach fun things. The Beach Bag is 21"W x 16"H. The pattern includes, the smaller Accessory bag (10"H x 7"W x 4"Deep), but the class does not make it.

Class including kit and pattern \$ TBD

[Mark Hordyszynski](#), Fabric designer, teacher, author

A native New Yorker, Mark spent two years studying at the Culinary Institute of America. Half a decade later, Mark chose to pursue his second career in menswear and attended the Fashion Institute of Technology (FIT). Mark's innate color sense and use of patterns and textures were rewarded during his years at FIT with a number of scholarships and awards. In 1989, Mark had the opportunity to design neckwear for Hermès, and was given a two-week internship at the design studio in Paris. After graduating from FIT, he took a position as an assistant designer for a thriving New York-based sweater company and headed the private-label division for five years. A textile project for a friend led to a design position at a major fabric converter, where he was responsible for merchandising customer and licensee accounts as well as designing for the open line. Next it was time for Mark to start his own business ventures, and in 2002 he was awarded Cotton Inc.'s 21st Annual Cotton Incorporated Textile Designer's Award for outstanding contributions to innovative design and styling in the Prints - Home category.

Mark is the creator of the Mirror Ball Dot and Rock Candy fabric lines. His Fairy Frost fabric line has sold over 2 million yards to date. He is currently licensing his designs on cotton to two New York-based textile companies for quilting, crafting, and manufacturing. Recent projects include the self-publication of his first novel, Shag; his collaboration with a documentary filmmaker/producer and animation studio as artistic director on an original concept for a television series; and plans for his own line of neckwear.

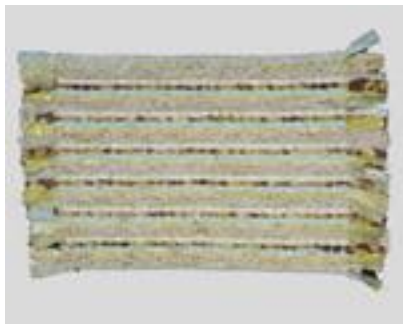

Beaded Starfish

Nothing says summer fun like a cute little beaded starfish. Join this class and create either a pin or even a Christmas ornament. Beads are glued on.

Class including kit and pattern \$20

Woven Placemat

Put your dinner plates on something different. This class will be weaving strips of Mark's "Rock Candy" fabric through rug canvas to make this unique placemat.

Class including kit and book \$ TBD

Bargello Laptop Bag

Why carry your laptop around in a boring old bag? Why not carry it around in a trendy summer quilted bag? After just four hours of class, you can be walking away with this adorable bag.

Class including kit and pattern \$ TBD

Barb Sackel, Fabric designer, top selling QuiltWoman.com pattern designer, teacher, author

Barb Sackel is a noted quilt maker, designer, and teacher throughout the Finger Lakes region of Western New York. Many of her patterns are appropriate for beginners, and help develop basic skills that will enable quilters to move on to Barb's more complex and demanding designs.

Barb's 4-in-1 designs can be used in many different ways — to showcase a special focus fabric, or with appliqué, embroidery designs, cross-stitch, or even quilting motifs.

Pinwheels

This is a fast and easy technique that can be incorporated to any size block and any size quilt. For this class we will be making 20 blocks and then using them as a border treatment for the next class featuring our flower pot.

Note: You may take this class independent of the flower pot. The blocks will make a very appealing baby quilt.

Class including kit and pattern \$ TBD

Flower Pot

Find the designer in you while spending time together in this class. You will receive pre-fused circles cut on the AccuQuilt GO! and will cut different flower shapes out. Together we will design a flower arrangement with all your cut flowers.

I will also be showing you how to secure these appliqué pieces to your work using free motion stitching with invisible thread.

Note: In this class we will only make the flower pot center. You may take the pinwheels class for the border.

Class including kit \$40

Batik Squares

Do you want to sew a quilt that is fast and easy? Then this two hour class is the one for you. This quilt boasts eye appeal and would be great for gift giving.

Class including kit and pattern \$ TBD

Butterfly Pin Cushion

When I sit at my machine, I tend to lose my pins. They fall to the back of the machine or onto the floor. Now with this easy to make Butterfly Pin Cushion, a pin cushion is right on my machine. There is no magnet to hurt your machine. You can easily attach it to your machine with sticky Velcro. You can also use these butterflies on your design wall to hold your pins or even hot glue a hair scrunchie to it for a wrist pin cushion! AccuQuilt GO! butterfly used.

Class including kit and pattern \$20

Vicki Steffenhagen QuiltWoman.com pattern designer, teacher, Bernina trained

Vicki took her first quilting class in 1975. She got into designing patterns because she couldn't find what she wanted commercially. Her friends liked her quilts so much, they convinced Vicki to go public with them. Her favorite kind of quilting is piecing, but she teaches many different quilting skills and techniques at Betty's Quilting Etc. When not quilting, she can be found at home gardening and playing with her Border Collie Tess.

**Sponsored classes to be announced
Bernina Machine Embroidery & AccuQuilt GO! projects**
